## WET ROOM FORMERS

Our wet room former kit consists of strong, but lightweight, shower tray and drainage system. Both components are coordinated with each other and form one unit, creating a level access showering system.

Our wet room kits are ideal for all modern, tiled, wet room areas. These kits create a level access shower. This eliminates the step up into the shower, creating a walk-in shower, ideal for individuals with disabilities or mobility issues.

### CENTRE DRAIN WET ROOM FORMERS
